

Usability test permissions form

Please read and sign this form.

In this usability test:

- You will be asked to perform certain tasks on the mobile BetterDays application.
- We will also conduct an interview with you regarding the tasks you performed.

Participation in this usability study is voluntary. All information will remain strictly confidential. The descriptions and findings may be used to help improve the BetterDays application. However, at no time will your name or any other identification be used. You can withdraw your consent to the experiment and stop participation at any time.

If you have any questions after today, please contact one of our team members at Gavin.m.pierce@maine.edu

I have read and understood the information on this form and had all of my questions answered

Hello, and thank you for agreeing to partake in the BetterDays usability test. BetterDays is a calendar app dedicated to helping you keep track of your habits and data. During this test, if for any reason you decide you need to leave, you may do so. During this test, you will be asked to perform certain actions within the BetterDays application, and I will observe how you go about achieving these actions. All actions and everything you say today will be kept confidential. Should you have any questions after your testing or any additional feedback after the test session today, please feel free to email anyone within BetterDays.

The testing today will consist of 5 tests.

1. Changing Timeframes
2. Creating a task
3. Filtering your task
4. Finding your Habits
5. Checking To Do list

Are you ready to begin?

<<Hand user a device with BetterDays running (or use the wizard of Oz technique with your mockups)>>

Change Views Challenge

For this first test, I would like you to change the calendar view from week to month, then month to day. Please begin when you are ready.

<<User will switch views>>

<<This process should happen within 30 seconds>>

Thank you. If that was difficult, it's our fault, not yours. *(explain how to do it if they couldn't figure it out. Make sure to take notes on what happened and seemed to cause the problem)*

Create a task Challenge

For the next test, we would like to see you create a task. Creating a task is how you will be able to view task on your calendar.

<<User will create a task>>

<< This process should take 1 minute >>

Thank you. If that was difficult, it's our fault, not yours. *(explain how to do it if they couldn't figure it out. Make sure to take notes on what happened and seemed to cause the problem)*

Filter Challenge

Now that you have created a task, let's try to filter your task for something that meets your desired needs.

<<User will filter for a specific task>>

<< This process should take 1 minute >>

Thank you. If that was difficult, it's our fault, not yours. *(explain how to do it if they couldn't figure it out. Make sure to take notes on what happened and seemed to cause the problem)*

Congratulations on filtering your task I hope you found the task you were looking for.

Find Habit Tracker Challenge

Now that you have found your task (I hope), let's try to find your habits to see how you've been doing.

<<User will find the habit tracker>>

<< This process should take 30 seconds >>

Find your To-Do list Challenge

Awesome! For the final test today, now that you've seen how you've been doing, let's keep that streak going and check your To-Do list. Please begin whenever you are ready.

<<User will check their to-do list>>

<< This process should take 1 minute >>

Thank you. If that was difficult, it's our fault, not yours. *(explain how to do it if they couldn't figure it out. Make sure to take notes on what happened and seemed to cause the problem)*

Thank you for your participation today in this test. Your participation has been very valuable. Let's wrap up with some questions:

Survey

On a scale of 1-10, how easy was it to change timeviews:

On a scale of 1-10, how easy did you find creating a task:

On a scale of 1-10, how easy did you find filtering for a task:

On a scale of 1-10, how easy was it to get to the habit tracker:

On a scale of 1-10, how easy was it to find your to-do list:

What features of BetterDays did you find easy to use:

What features of BetterDays did you have a difficult time using:

What is one way BetterDays could be changed to be easier to use:

What does BetterDays need to have added to it, so it actually helps people <actually achieve the ultimate goal of the app i.e. Keep track of your habits and tasks>?

Are there any other features or functionality that you think would be good to have in the app?

Is there any other feedback you would like to provide on improving the app?

Caramon Cotroneo

On a scale of 1-10, how easy was it to change timeviews:

10

On a scale of 1-10, how easy did you find creating a task:

8

On a scale of 1-10, how easy did you find filtering for a task:

8

On a scale of 1-10, how easy was it to get to the habit tracker:

10

On a scale of 1-10, how easy was it to find your to-do list:

9

What features of BetterDays did you find easy to use:

Navigation was pretty easy, switching between menus and views. Felt intuitive.

What features of BetterDays did you have a difficult time using:

Not complicated, but adding extra labels the provide more descriptions

What is one way BetterDays could be changed to be easier to use:

Not much, just extra labels

What does BetterDays need to have added to it, so it actually helps people <actually achieve the ultimate goal of the app i.e. Keep track of your habits and tasks>?

Make sure the app supports notifications to remind you of your tasks. Additionally, you could task streak or opening the app streak to encourage you to open the app more.

Are there any other features or functionality that you think would be good to have in the app?

Streaks! And notifications.

Is there any other feedback you would like to provide on improving the app?

Smooth animation when clicking on a given day on the habit tracker month view.

Survey

Chris Noonan

On a scale of 1-10, how easy was it to change timeviews:

10

On a scale of 1-10, how easy did you find creating a task:

10

On a scale of 1-10, how easy did you find filtering for a task:

9

On a scale of 1-10, how easy was it to get to the habit tracker:

9

On a scale of 1-10, how easy was it to find your to-do list:

9

What features of BetterDays did you find easy to use:

It was pretty easy to see everything that I would want.

What features of BetterDays did you have a difficult time using:

The monthly habit tracker was a little confusing due to the black and white and it didn't signify what day it was currently

What is one way BetterDays could be changed to be easier to use:

Just what was said above

What does BetterDays need to have added to it, so it actually helps people <actually achieve the ultimate goal of the app i.e. Keep track of your habits and tasks>?

Could do a reward or streak system for getting tasks done. Make a fun sound when you check tasks off and have notifications

Are there any other features or functionality that you think would be good to have in the app?

Streaks and notifications.

Is there any other feedback you would like to provide on improving the app?

10

On a scale of 1-10, how easy did you find creating a task:

10

On a scale of 1-10, how easy did you find filtering for a task:

10

On a scale of 1-10, how easy was it to get to the habit tracker:

10

On a scale of 1-10, how easy was it to find your to-do list:

10

What features of BetterDays did you find easy to use:

It was all intuitive

What features of BetterDays did you have a difficult time using:

They all made sense to me

What is one way BetterDays could be changed to be easier to use:

Funny colors

What does BetterDays need to have added to it, so it actually helps people <actually achieve the ultimate goal of the app i.e. Keep track of your habits and tasks>?

As it is right now, I believe it hits that goal well

Are there any other features or functionality that you think would be good to have in the app?

In the habits, it would be helpful to show advanced data for the day

Is there any other feedback you would like to provide on improving the app?

Nope

Is there any other feedback you would like to provide on improving the app? It's a good calendar

Review Notes

Needed Revisions:

After reviewing the in-class exercise and my own testing, I found that the concept and design sat well with the test subjects, but there were a few aspects that had to be fixed to be either cleaner or more intuitive for users. These changes are in the following sections

Calendar

Many testers complained that the calendar did not allow a user to select the day of the week and immediately go to that day. This has been updated, and now if you select the day at the top of the week, you will navigate to that specific day same goes for the month view if you select that day's number.

Habit Tracker

Month View

The habit trackers' snake view was a mixed reception; many liked the design, saying it was interesting, but just as many said it was confusing and unintuitive. To fix this, I swapped to an off-screen connection that feels more like a calendar than it did previously. Alongside this fix the month that you are on is now shown as the month begins to help the user navigate their habits.

Day View

A simple change that some users thought was needed was a streak indicator for how many days you have been keeping on track with your task.

Habit Data

A big complaint was that we talked about tracking your habits, but did not go into detail to fix this issue when you are viewing an individual day, and you select that day, you are moved into a view that shows you day-specific analytics.

To-Do

Many testers mentioned that the to-do tasks did not hold the tags associated with them, and they could not easily see how many tasks are due that day without opening each day. On top of that, I personally did not like the look and revamped the feel of it. At the top of the page, you may now search through your choice of set dates. For the actual task holders, I added a number you can immediately look at without opening it. For each individual task, I added a quick button that allows the user to complete the task by looking at the list, as well as showing the task they are associated with.

Colors

Only comments received in this round of testing are that color is needed to make the app more interesting, so the revisions to the UI this time will be adding a color scheme.
